DETAILED ACTION

Response to Amendment

1. The amendment filed 6/13/07 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3-9, 11-14, and 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Kosaka (US 6,038,062 published Mar. 14, 2000).

With regard to claims 1, 9, and 14, Kosaka discloses a concatenation of amplifiers (fig. 9); further fig. 2 is an inset of each amplifier of fig. 9;

- a 1st optical amplifying unit (1st instance of #22) amplifying an input light;
- a 2nd optical amplifying unit (2nd instance of #22) amplifying an output light;
- a 1st input branching unit (#18) branching the input light;
- a 2nd input branching unit (#23) branching the output light;
- a 1st optical filter (#36) passing a specific wavelength of the branched input light;
- an 2nd optical filter (#26) passing a specific wavelength of the branched output light;
- a 1st specific wavelength (#37) measuring unit measuring power of filtered input light;

Art Unit: 3663

- a 2nd specific wavelength (#28) measuring unit measuring power of filtered output light;
- a total power measuring unit (#38 and #27) measuring the light power of the branched input light and the branched output light; and
- a control unit (#33 and #29) controlling the optical amplifying units based on the light power measured by the specific wavelength measuring units and the total power measuring units.

With regard to claims 3-4, 11-12, and 16-17, note col. 10, lines 40-53.

With regard to claims 5, 13, and 18, the amplifiers are gain controlled via control of the pump #21.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2, 10, and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kosaka in view of Fujita (US 6,008,935 published Dec. 28, 1999).

Kosaka does not specifically disclose a variable wavelength optical filter. However, Fujita teaches a variable wavelength optical filter for AGC based on a detected branched light (#40). It would have been obvious to one of ordinary skill in the art at the time the invention was made to use a variable wavelength optical filter for the advantage of isolating a specific channel in the WDM signal.
